

EDUCATION

- **Corona High School** Corona, CA
High School Diploma; GPA: 4.15 Aug. 2020 – Dec. 2024
- **University of California, San Diego** San Diego, CA
Bachelor of Science, Data Science Sept. 2024 – Present

EXPERIENCE

- **Principles of Data Science** San Diego, CA
Student Sept. 2024 - Dec. 2024
 - **Content:** Completed an introductory course in Data Science with focus on data exploration, statistical inference, and prediction, becoming proficient in Python for data manipulation, visualization, and simulation and applying analytical techniques to real-world datasets of various domains.
- **Programming and Basic Data Structures for Data Science** San Diego, CA
Student Jan. 2025 - Apr. 2025
 - **Content:** Completed an intermediate-level course in data science programming in Python, learning recursion, higher-order functions, object-oriented programming, interpreters, and simple data structures (arrays, lists, linked lists) and improving abstraction and algorithmic problem-solving capabilities.
- **Data Structures and Algorithms for Data Science** San Diego, CA
Student May 2025 - July 2025
 - **Content:** Completed an advanced Java programming course, developing larger computational systems through various projects with concepts like encapsulation, abstract data types, interfaces, algorithms, complexity analysis, and data structures (stacks, queues, heaps, linked lists, trees, and hash tables).
- **IDX Exchange Data Analyst Internship** San Diego, CA
Intern June 2026 - Sept 2026
 - **Description:** Involved in the workings of a data analyst and discovered many ways to organize and analyze data from real time MLS datasets within real estate. Also worked with software such as Excel and Tableau in order to make organized and detailed models and graphs to show and tell a story.
 - **Job:** Was given the position to be a group leader within the duration of my internship position. I led group members and held a great amount of responsibility to make sure that tasks were finished and up to par of what the program expected it to be. Held weekly meetings to make sure that there were no difficulties and allowed group members to share what they did and ask questions about them.

RELEVANT COURSEWORK

- **Calculus for Science and Engineering:** Differential and integral calculus of one variable, including limits, derivatives, integrals, infinite series, and applications with algebraic, exponential, logarithmic, trigonometric, hyperbolic, and polar functions.
- **Linear Algebra:** Matrix algebra, Gaussian elimination, determinants. Linear and affine subspaces, bases of Euclidean spaces. Eigenvalues and eigenvectors, quadratic forms, orthogonal matrices, and diagonalisation of symmetric matrices.

PROJECTS

- **Friends TV Show Data Analysis:** Analyzed Friends TV show datasets using Python (Pandas, NumPy, Matplotlib) to clean data, visualize trends, and extract insights on character dialogue and episode patterns.
- **Multimedia Processing Toolkit (Python):** Developed a Python multimedia toolkit implementing RGB image operations, WAV audio effects (reverse/slow/fast/reverb/clip), and a KNN image-classifier scaffold, with I/O and visualizations using PIL, NumPy, and Matplotlib.

PROGRAMMING SKILLS

- **Languages:** Python, Java
